

Hello,

Perch Lake Board meeting and updates

Here is an update on the Perch Lake Board meeting that took place May 24th. Earlier that morning Rick Buteyn plus two other employees of Progressive AE took an early and foggy morning boat trip out on the lake to observe the conditions of the weeds. At the meeting they reported that the weeds have started out progressively early this year.

In the meeting it was decided to harvest approximately 11 to 15 acres of weeds again this year. There will be another survey done on June 14th prior to the harvest, which will take place the week before July 4th. Another survey will take place sometime after that to figure out a date to go forward with the chemical weed kill process.

Tim Rau has respectively submitted his resignation from the position of Abutting Property Owners Representative. The Holiday Beach Association Board will need to submit a new candidate to represent our association at the next Perch Lake Board meeting on September 13th 2021.

PS. Since writing this, I have just received some changes to the weed harvesting date for our lake, it has been bumped up to June 9th & 10th. I will also send a map showing the areas to be cut. Please contact me if you have any questions.

We will keep you informed with any other changes or updates as they happen.

Thank You,
Chuck Rau
